# ELCYDA DECORATING TECHNIQUES

Decals are utilized for tight registration or multiple colour designs. Decals are generally hand applied to the product. Decals often allow for a larger decorating area on many items. Decals offer the advantages of increased resolution, product application flexibility and tighter registration. There is no difference in the final lasting permanence of a decal and between the direct screen process.

## DECALS

Metallic Gold or Platinum Halo enhancements are available upon request for most glass and ceramic items.

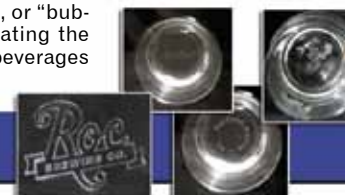

## GOLD HALOS

Sandblasting requires skill and individual craftsmanship from our artisan. This high perceived valued process is a permanent technique of the artisan who sand blasts your design with fine detail into the glass vessel.

## SANDBLASTING

Nucleation is the process of having your design laser etched into the bottom of your glass for a unique branding process. Laser etching creates more effervescence, or "bubble, within your beverage by circulating the air in the glass. This allows your beverages to stay fresher longer.

## NUCLEATION

An economical option to Deep Etching. Ideal for personalization & monogramming. Create an elegant impression with our laser etching.

## LASER ETCHING

Almost any glassware can be Color Sprayed with colours that are durable in the dishwasher. This technique enhances the value and beauty of the glassware.

## ORGANIC COLOUR SPRAY

Direct Screen Imprints are printed directly onto the product or item. This is generally the most economical imprint method.

## DIRECT SCREENING *One or Multiple Colour*

4 Colour Process involves making computer separations from a customer's original full colour artwork, breaking down its full range of multiple colors and tones into four basic colors. Four color process decals have the same lasting permanence as a direct screened imprint.

## 4 COLOUR PROCESS

Reverse Printing on glassware enables the reader to view the message or logo while looking through the Glassware.

## REVERSE IMPRINTING

"Glass-On-Glass" is a very special innovative decorating process applicable to most glass items. The result is similar to embossing or the "raised" effect, but saves the cost of a mold. Your design or brand appears as if it's part of the glass.

## GLASS ON GLASS

Satin Etch is a very popular imprint choice. Satin Etch has an elegant look and feel. Satin Etch is less costly than actual deep etching, you may reproduce fine details and it is priced as a one-colour imprint.

## SATIN ETCH

Sublimation imprints are created with high resolution line screen decals (heat transfers) using special inks. The heat transfer is applied under heat and pressure, which create bolder and brighter colours with maximum coverage to the design.

## SUBLIMATION

# Sandblasting

## *Glass*

Glass provides a wide variety of results, from a subtle translucent frosted effect to an almost opaque white look. Any desired depth can be achieved with multiple depths within a single artwork.

## *Ceramics*

Simple Sandblasting reaches right to the matte white interior. On ceramics, a high contrast or very subtle look can be achieved.

2 Tone Sandblasting reaches 2 different depth levels. On ceramics, the first level removes gloss and lightens the colour. The second, deeper level reaches to the matte white interior.

## *Metal*

On bare metal, a very subtle texture is achieved resulting in a frosted matte look.

On Powder Coated Metal, a slightly lighter colour is achieved leaving a matte look.

# Sublimation

## Four Colour Process

*4 Colour Process prices include all set-ups*

*Hand Wash Only for 4 Colour Process Items.*

*Selling Tips:  
Company logos are becoming more & more intricate. Choose one of our four colour process items to hit those 6-12 colour corporate logos!*

*4 Colour Process prices include all set-ups*

*Must be sold in complete case sizes*

*Hand Wash Only for 4 Colour Process Items.*

## Grand Vin

Each tasting experience will find the perfect glass in the Grand Vin line. The traditional tulipe shape of the Grand Vin glass is recognized as being one of the best wine tasting shapes in the world of wine tasting. The sheer rim of these glasses enhance the subtlety of the wine's aromas and flavor.

**GRAND VIN**

- Break-resistant lead-free Crystal: 30% stronger than standard crystalline glasses
- Dishwasher safety: Retains its original diamond like brilliance over 2K Industrial dishwashing cycles.
- Complete transparency (over 98.5 transparency index)
- Perfect acoustics provide the musical resonance of fine crystal glass
- Seamlessly stretched stems
- Seamless joint between stem and bowl
- Seamless joint between stem and foot
- Thin rim (1.2mm)
- Universal tulip-shaped bowl shape accommodates red wines in the larger capacities and lighter wines in the smaller capacities
- One of the most popular fine rim collections within the restaurant and hospitality industry in North America for many years.

## Domaine

- Break-resistant lead-free Crystal: 30% stronger than standard crystalline glasses
- Dishwasher safety: Retains its original diamond like brilliance over 2K Industrial dishwashing cycles.
- Complete transparency (over 98.5 transparency index)
- Perfect acoustics provide the musical resonance of fine crystal glass
- Seamless elongated stems
- Seamless joint between stem and bowl
- Extra flat foot provides enhanced quality, added stability and ergonomics favored by wine connoisseurs.
- Extra Thin rim (1mm)
- Soft curve in the lower part of the bowl for an updated and transitional look that will work well with younger wines
- Bordeaux and Burgundy varietal specific shapes available.
- Long line with bowls delineated in different shapes and capacities, including specialty items and barware

## Reveal Up

Reveal Up creates a dialogue between wine and glass that awakens the four senses used by wine enthusiasts. **Touch:** the perfect balance of Reveal Up glasses allows for a pleasant experience when held, allowing the wine to swirl easily. **Sight:** The architecture of the glass brings together curves, angles and finesse, forming a perfect visual harmony. **Smell:** a large surface of oxygenation allows the wine to breathe. A chimney in the upper part of the bowl attenuates the perception of alcohol in younger wines. **Taste:** The Reveal Up collection is suitable for tasting both young and mature wines

**REVEAL UP**

- Break-resistant lead-free Crystal: 30% stronger than standard crystalline glasses
- Stems are treated to have a strength 2x greater than hand torque when twisted
- Dishwasher safety: Retains its original diamond like brilliance over 2K Industrial dishwashing cycles.
- Complete transparency (over 98.5 transparency index)
- Perfect acoustics provide the musical resonance of fine crystal glass
- Seamless elongated stems
- Seamless joint between stem and bowl
- Extra flat foot provides enhanced quality, added stability and ergonomics favored by wine connoisseurs.
- Extra Thin rim (0.9mm)
- Chimney in the upper part of the bowl diminishes the perception of alcohol in younger wines, allowing the full aroma to be discovered
- Soft shape best suited for young, light bodied wines.
- Intense shape, with its generous bowl, is ideal for mature, earthier, more tannic red wines
- Soft Fresh stemless sits on a unique chilling base that ensures blush, sparkling or light white wines maintain the perfect temperature
- Endorsed by Julia Scavo, ranked one of the top five sommeliers in the world.

**30%**

30% extra strength on the rim compared to standard crystalline items on the market.

**2X**

The stem, even after being scratched, has a mechanical resistance that is twice that of other standard crystalline items on the market.

**100%**

Clear and pure.

**2000**

Keeps its original qualities even after 2,000 cycles in a professional dishwasher.

## Macaron

The Macaron collection evokes the pleasure of a perfect food and wine pairing through its gourmet name and its remarkable shape. Its bold, rounded contours are ideal for wine.

Their potency is reinforced by the two chambers of the glass. The elegant, dazzling shape of champagne glasses, which are neither flutes nor coupes, is designed to release the aromas of effervescent wines and entice you to have a taste.

## Highland

### ST. COLMAN'S WELL, ROSS-SHIRE

Allow us to introduce St Colman, founder of several churches in the Highlands of Scotland during the 7th Century. It must have been thirsty work, for there is a well that bears his name to this day. St Colman's Well, close to some of the popular Highland distilleries, is where we take our Highland water for Uisge Source. The water is filtered through red sandstone and limestone rock strata. So it's hard and rich in minerals, as is the water used by the nearby distilleries. The locals were frequent visitors to the well over the centuries. Here you can still see several rocks with cup marks in them. It seems longevity was commonplace too, with ages of 117 and 107 being recorded.

Could a drop of Uisge Source change your Highland malt from the 'water of life' into the 'water of longer life'? We're sure you'll enjoy finding out.

## Islay

### THE ARDILISTRY SPRING, ISLAY

Imagine you have been miraculously transported to Islay, ancient stronghold of the Lord of the Isles. You are squelching across one of the great swathes of peat bog that typifies the landscape hereabouts. As the water wells up over your boots pay it a modicum of respect. For this is the very peat-filtered water used to make the famous Islay single malts. And the same naturally acidic water that feeds our very own Ardistirly Spring, making it the ideal companion to the aforesaid malts. The spring lies just a couple of miles from the main Islay distilleries. You'll find it on a single-track road heading towards the historic 8th century Kildalton Cross. Perhaps this proximity to an ancient Christian relic is no coincidence.

After all, when you add Uisge Source Ardistirly Spring water to Islay malt, the result is indeed very close to heaven.

## Speyside

### THE CAIRNGORMS WELL, MORAY

The date is 7th October 1859. A breathless Queen Victoria has just reached the summit of Ben Macdui, the highest peak in the Cairngorms. In her words "It had a sublime and solemn effect, so wild and solitary...I had a little whisky and water, as the people declared pure water would be too chilling."

Well, that's her excuse, as though any excuse is needed to enjoy a dram of Speyside single Malt.

Fast-forward to today and you don't have to be Royalty to enjoy the right water in your Speyside malt. Our water is from The Cairngorms Well, one of Scotland's highest natural springs. Emerging from the River Spey catchment and flowing over hard rock strata the water is soft and low in minerals, like that used by many Speyside distilleries.

There are over 45 Speyside malts. But, we would argue, just one water good enough to add to them
